Dr. Judy Goodsworth

Tacoma Pediatric Center

2001 Suit B Woodpecker Lane, Tacoma Washington, 90255

Dear Dr. Goodsworth,

I am writing to express my interest in the open physician position you have within your establishment. With my bountiful academic background and record of success with internships and residencies, I believe I would make an ideal candidate. I am a graduate of Duke University's School of Medicine, and have received my license to practice. Over 7 years of experience in both clinical and hospital settings has led me to realize my true passion of working to help children, and it is with great enthusiasm that I welcome the opportunity to join your team.

Kids Together Clinic, my current employer, has allowed me to thrive and reach new levels of professional development. However, I am ready to expand my personal growth and knowledge by bringing my unique skill set and passion for pediatric medicine to your facility. Among my top responsibilities at Kids Together Clinic are developmental monitoring, keeping up with immunization records, and regularly communicating with specialists and parents to provide detailed and in depth descriptions of a child's health and conditions.

I've had the privilege to work alongside a renowned leader in pediatrics, Sarah Badran, and publish a study related to implementing art and music therapy alongside medical treatments for children. We discovered many benefits within the additional therapy, and concluded its success when we presented our findings at last year's annual Medical Advancements Seminar. This experience also gave me the chance to travel abroad and see firsthand how these therapies were already leaving their effects on children in Europe.

I can offer you outstanding organizational skills, exceptional communication abilities, and an extensive knowledge of medicine. My expertise lies in pediatrics, and I possess a true passion for working with children. I have developed a great sense of empathy and compassion, and I am a strongly determined individual who continuously seeks out answers and ways to solve medical issues. I am great at forming relationships with my clients, and have a knack for easing the nerves of both children and parents.

With my professionalism, analytical skills, and genuine devotion to this field of study, I know that I would serve as a great addition to your company. My past experiences and successes have paved the way for me to easily transition into a member of your team, and I look forward to

discussing my qualifications with you further. I sincerely thank you for your time and the opportunity.

Sincerely,
Doris Halpert
